## SKILLS

---

**Programming Languages** PHP, JavaScript, SQL, HTML, CSS, C++, Python,Java

**Frameworks** Bootstrap

**Tools and IDE** Git hub, Dev C++, Vs code, Anaconda, Turbo C++

## WORK EXPERIENCE

---

### Web Development Training, Complete IT solution

July 2023 : September 2023

- During my training at complete IT solution, I covered a range of topics in a user-friendly and accessible manner. This included the basics of using Git and GitHub for version control, understanding object-oriented programming (OOP) concepts.

## PERSONAL PROJECTS

---

### Cafe Site

- Developed a dynamic cafe website I used core HTML, CSS and vanilla Java Script. In this site we can place order and check the items of Menu . Its only based on front end web devloping.

### Tin Dog site

- Developed a dynamic Tin Dog website using basic concepts of HTML, CSS and Java Script with a responsive design for dog lovers . Tin dog is a fictional concept inspired by Tinder, but tailored for matching people with dogs for playdates or to find potential mates for their pets. In this site users would create profiles for their dogs, including photos and the information about their pets.

## EXTRACURRICULAR

---

### National Service Scheme

- Proudly serve as the volunteer and coordinator both positions of our NSS team. Here, I worked in a Event Managment Team and held many types of activites and blood donation camp in our college campus.
